

# PLANFARM TERRAWISE MAPPING SERVICE

Planfarm TerraWise offers high-quality GIS mapping tailored for practical farm management. From paddock planning to soil and infrastructure insights, our maps help you make clearer, faster decisions backed by reliable spatial data.

## What We Offer

### Farm Infrastructure & Land Use Mapping

- Paddock and property boundaries
- Fencing, laneways, waterpoints, sheds
- Land use history and management zones

### Soil & Landscape Insights

- Radiometric mapping: Understand variations in soil type and fertility
- Soil type & complex mapping
- Elevation, slope, drainage and erosion risk

### Seasonal and Historical Imagery

- Satellite and drone imagery
- Historical soil testing mapping
- NDVI mapping
- Track seasonal trends

### Paddock & Grazing Planning Tools

- Crop and pasture rotation visualisation
- Stocking zone mapping
- Grazing corridors, water access, and buffer zones

## Why Farmers Use Our Maps

- See your farm clearly all in one place
- Plan with confidence using land capability data
- Crop insurance requirements
- Due diligence for purchase, sale or lease
- Target inputs more precisely with soil variation insights
- Carbon project compliance and design

## Your Maps, Your Way

We tailor our mapping services to your needs, whether you're after a simple paddock layout or detailed soil and vegetation overlays.

- Delivered as high-resolution PDFs ready for printing or sharing
- Spatial files (e.g. shapefiles or KML) available for use in GPS units, farm software, or further analysis
